MANVENDRA SINGH

Project Engineer – Oil & Gas | Downstream Fuel Infrastructure, Terminals & Retail Network | Electrical Engineer

Jhansi, Uttar Pradesh, India | manav.pec@gmail.com

PROFESSIONAL SUMMARY

Oil & gas professional with 15 years at Bharat Petroleum Corporation Limited (BPCL), spanning retail network engineering and maintenance, owner-side project execution, fuel terminal and depot operations, and petroleum retail network management. Currently manage maintenance, statutory licensing, capital expenditure and EV-charging expansion for a 160+ outlet retail network. Electrical engineering background with hands-on execution of pipeline, electrical & instrumentation (E&I), automation, firewater and civil work packages at the BPCL Uran LPG plant, with responsibility for contractor coordination, schedule and quality compliance, cost control and statutory coordination. Subsequent leadership of terminal automation, product quality, dispatch operations and a 90+ outlet retail network. Seeking project engineering and project delivery roles in the Middle East (UAE, Saudi Arabia, Qatar, Oman).

CORE COMPETENCIES

- Multidisciplinary oil & gas project execution & delivery | Contractor, vendor & subcontractor coordination
- Tender drafting, RFQ preparation & vendor negotiation | Cost control & progress reporting
- HSE & statutory compliance coordination | Hazardous-area electrical systems, earthing & testing
- E&I and automation systems for pipelines & terminals | Pipeline, terminal, depot & retail fuel infrastructure
- Commissioning & handover support | Preventive maintenance & asset reliability
- Statutory compliance & government authority liaison | SAP (Materials Management, Hydrocarbon) & MIS reporting

PROFESSIONAL EXPERIENCE

Bharat Petroleum Corporation Limited (BPCL), India – September 2011 to Present

Retail Engineering Officer
May 2026 – Present

Jhansi, Kanpur Territory (Network Engineering & Maintenance)

- Manage maintenance of 160+ retail outlets across Jalaun, Jhansi and Lalitpur districts (Uttar Pradesh), covering routine equipment maintenance to minimise downtime and prevent sales loss.
- Liaise with statutory authorities for grant of petroleum licences for retail outlets; anchor expansion of EV charging infrastructure across the network.
- Handle capital expenditure of Rs 135 billion in the network area.

Retail Sales Officer
Oct 2023 – Apr 2026

Nizamabad Territory (Sales & Network Development)

- Managed a network of 90+ petroleum retail outlets across Siddipet, Rajanna Sircilla and Kamareddy districts, covering sales performance, dealer management, infrastructure upgrades and new-outlet development, with combined annual turnover of Rs 6100+ million.
- Coordinated statutory compliance, NOC acquisition and liaison with government authorities (petroleum, explosives, fire, electricity and civic bodies) for retail operations and network expansion projects.
- Achieved and maintained market leadership in petrol (MS) and diesel (HSD) with positive market-share gains in FY 2024-25; awarded for highest lubricant growth and highest strategic outlet reconstitution in AP & Telangana state.

Retail Operations Officer
May 2021 – Sep 2023

Rairu Depot (Terminal Operations)

- Subject-matter expert for depot automation and vehicle tracking systems (VTS), driving digitalisation of terminal operations.
- Managed petroleum product quality control and regulatory compliance, supported by Aviation Fuel Quality Control & Safety (QCS) certification; planned daily tank-lorry dispatches and logistics scheduling for depot throughput, inventory management and process improvement.

Retail Operations Officer
May 2017 – Apr 2021

Navagam Terminal (Terminal Operations)

- Managed terminal automation and vehicle tracking systems for operational monitoring, performance tracking and product-loss control; coordinated product quality, regulatory compliance and tank-lorry dispatch planning.

Retail Sales Officer
Jun 2016 – Apr 2017

Ahmedabad C Sales Area (Retail Operations)

- Managed sales, maintenance coordination and statutory requirements for 33 retail outlets, including two company-owned, company-operated (COCO) sites.
- Delivered 2nd position in petrol and 1st position in diesel market-share growth among oil marketing companies in the assigned sales area.

Site Engineer
May 2013 – May 2016

Engineering & Projects (West), Uran LPG Plant

- Executed electrical, instrumentation and automation works for the 8-inch LPG pipeline connecting BPCL Uran and ONGC Uran, including hazardous-area electrical systems, earthing and testing.
- Coordinated multidisciplinary project execution with vendors and subcontractors, with responsibility for quality assurance, schedule compliance, cost control and resource optimisation.
- Executed replacement of a 24-inch petroleum pipeline at the JNPT liquid cargo jetty, and construction of two 6,600-kL firewater tanks (22 m diameter, 18.5 m height) with associated firewater infrastructure.
- Installed 3-inch and 4-inch mass flow meter (MFM) systems; managed cryogenic butane-tank decommissioning involving nitrogen purging.
- Delivered associated civil works: 330-metre boundary wall reconstruction with concertina fencing, tank-truck parking extension and tank-truck degassing gantry construction.

Operations Officer
Sep 2011 – Apr 2013

Vadinar–Bina Pipeline, Thamna Intermediate Pumping Station

- Managed operation, maintenance, pipeline integrity and safety compliance at an intermediate pumping station on a cross-country petroleum pipeline.

KEY PROJECTS

BPCL Uran–ONGC Uran LPG pipeline
Budget: 15 million rupees

Scope: Electrical, Instrumentation and automation execution for 8-inch LPG pipeline.

Outcome: Handed over within the scheduled 18 months, with 10% overall cost savings.

JNPT liquid cargo jetty
Budget: 6 million rupees

Scope: Replacement of 24-inch petroleum pipeline

Outcome: Completed within the stipulated schedule at JNPT Jetty, Raigad, Maharashtra, despite restricted execution windows due to jetty operational constraints.

Firewater infrastructure, Uran LPG plant
Budget: 60 million rupees

Scope: Two 6,600-kL firewater tanks and associated systems

Outcome: Handed over within the scheduled 12 months, with 7% overall cost savings.

LPG plant civil infrastructure
Budget: 10 million rupees

Scope: Tank-truck parking extension

Outcome: Handed over within the scheduled 6-month period.

EDUCATION & CERTIFICATIONS

Education: Master of Engineering (Electrical), 2011 | Bachelor of Science (Electrical Engineering), 2009

Certification: Aviation Fuel Quality Control & Safety (QCS) Certification

Technical training & tools: SAP – Materials Management (MM) and Hydrocarbon modules; MS Excel and MIS reporting; BPCL SOP, HSE and policy-compliance training; depot/terminal automation and vehicle tracking systems (VTS)

ADDITIONAL DETAILS

Nationality: Indian

Location & mobility: Jhansi, India; open to relocation across GCC (UAE, Saudi Arabia, Qatar, Oman)

Visa status: Requires employer sponsorship / employment visa

Notice period: 1 month

Languages: English (professional); Hindi (native)
